\* To compile a complete part number, please replace the .. with the required output connection style.

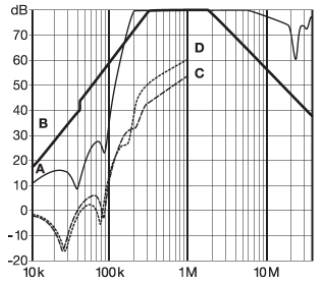

\*\* Calculated at rated current, 440 VAC (FN 258) / 690 VAC (FN 258 HV) and  $\cos \phi = 0.8$ . The exact value depends upon the efficiency of the drive, the motor and the entire application.

\*\*\*Maximum leakage under normal operating conditions (FN 258 at 440 V, FN 258 HV at 690 V). Note: if two phases are interrupted, worst case leakage could reach 5.7 times higher levels.
