

Perfect Liquid Handling

PRECISE RESULTS WITH INNOVATIVE TECHNOLOGY

VITLAB 
Competence in Labware

Reliability from development to service.

Tradition

VITLAB can look back on a history of almost 100 years. VITRI GmbH & Co. KG was founded in Mühlthal (Germany) back in 1908. In 1989, the laboratory division was established as the independent company, VITLAB. Today, VITLAB is a leading manufacturer of liquid handling instruments and performance plastic products for one-time or long-term use. We develop and manufacture these products at our own production facility.

Product range

VITLAB supports laboratory work on a myriad of applications with its comprehensive product range. Whether you're measuring volume, taking and storing samples or you just need general laboratory tools – our laboratory products are developed and manufactured with the aim to simplify your daily work, and ensure consistently perfect results.

Quality

Independent inspections and routine internal audits guarantee the effectiveness of VITLAB's quality management system throughout the company, from development to shipment. As a result, the phrase 'Made by VITLAB' has become synonymous for quality.

Service

Thanks to its intensive partnerships with distributors almost everywhere in the world, VITLAB can offer reliable availability of its products, sound advice and seamless logistics. Our qualified product training sessions provide information and tips on using our laboratory products and liquid handling devices. Just in case, our trained repair service is on hand to keep downtimes to an absolute minimum.

Ultimate liquid handling precision.

Simple and safe

Liquid handling represents a large portion of routine laboratory work. The devices you use must allow you to carry out your work easily and safely and, above all, to provide the precision you expect. VITLAB specializes in devices for titration and precise volumetric dispensing for a wide range of applications. But we don't ignore your convenience: VITLAB's liquid handling devices are easy to take apart, thanks to their modular construction, and are very simple to clean. All parts are replaceable, to ensure long-term use, cost-effective maintenance, and minimal downtime.

Our conformity certification confirms that accuracy and precision exceed the German standard DIN EN ISO 8655. For each liquid handling device, the VITLAB certificate documents:

- accuracy (R%)
- coefficient of variation (V%)
- device type
- serial number

This product data is stored at VITLAB and may be accessed by request. This assures long term traceability of test results for VITLAB instruments.

Delivery Programme

Burettes

Dispensers

Micro-dispensers

Titration with new dosage technology.

Bottletop burette VITLAB „continuous“

Chemical volumetric analysis with minute liquid volumes requires a great deal of concentration. With VITLAB „continuous“, the bottletop burette, you can carry out continuous titration and comfortably attain secure results – and save a lot of time in the process. The patented¹⁾ double-piston pump holds the solution to be measured permanently and pulse-free – filling procedures are not necessary. Furthermore, this innovative technology increases security; its compact structure and low center of gravity reduce risk of spillage, especially with smaller bottles. The height and length of the discharge tube can be adjusted,

allowing you to work safely with both short and tall bottles. The patented²⁾ return dosage system from VITLAB has two advantages: it prevents the loss of valuable reagents and reduces the risk of splashing. The simple-to-use calibration function helps meet all the requirements of testing-apparatus monitoring - with minimal downtime. Margins of error are well within those specified in the German DIN EN ISO 8665-3 standard, even for partial volumes.

¹⁾ EP 801 982

²⁾ EP 542 241

By turning both thumbwheels, the titration liquid is pumped continually by the patented¹⁾ double-piston pump.

The patented²⁾ recirculation valve from VITLAB reduces reagent loss and increases safety.

The angled display clearly shows the titration volume and simplifies operation.

Long operating life from two easily-replaced micro-batteries 1.5 V

Large, easy-to-read digits

Simple, media-specific readjustment via keypad

Continual supply of titration medium with patented¹⁾ double-flask pump

Telescopic discharge tube which can be adjusted in both height and length

Continuous and precise regulation of titration speed with a large practical thumbwheel.

Reduced titrant waste with patented²⁾ recirculation valve

Rotates freely 360° on bottle to a convenient position

Adaptable to bottles of different sizes

Telescopic, extractable intake tube adapts burette to bottles of varying heights

Totally reliable dispensing

Bottletop dispensers VITLAB „genius“ and „simplex“

Extracting measured amounts of liquid from bottles is a routine laboratory task best carried out quickly, accurately, precisely, simply and safely, and without reagent loss.

The VITLAB „genius“ and VITLAB „simplex“ bottle top dispensers are precision devices that not only accomplish these objectives, but also offer many other advantages. The direct displacement plungers, for example, use a fluoroplastic (PFA) seal that works like a windscreen wiper to prevent build-up of easily crystallizing media on the cylinder wall. The glass cylinder is also coated with a synthetic material that reduces risk of splashes if breakage should occur. The telescopic intake tube can easily be smoothly adjusted

to the height of the bottle. And, since the materials in contact with the media (PTFE, PFA, FEP, borosilicate glass and platinum-iridium) are resistant to acids, solvents and bases, the bottle top dispensers from VITLAB can be applied almost universally. All VITLAB dispensers are completely autoclavable at 121°C.

VITLAB „genius“ is also equipped with our patented²⁾ recirculation valve that reduces reagent loss when ventilated. The simple-to-use calibration function of the „genius“ helps to meet all of the requirements of testing-apparatus monitoring, with the minimum of downtime.

Media-specific readjustment by turning the adjustment setting („genius“ only)

Smooth handling! Direct displacement plunger with broad PFA seal prevents crystallization build-up.

Settings are quickly and accurately adjusted with a practical screw mechanism

Reduced titrant waste with patented²⁾ recirculation valve („genius“ only)

Rotates freely 360° on bottle to a convenient position

Attached tube-cap reduces the risk of drips

Adaptable to bottles of different sizes

Telescopic, extractable intake tube adapts dispenser to bottles of varying heights

Serial pipetting of the innovative kind.

Micro-dispensers VITLAB „piccolo 1“, „piccolo 2“

New analysis systems in all areas of biochemistry and medical research have made it vitally important to be able to dose out tiny quantities of liquids quickly and conveniently. With the VITLAB „piccolo“ you can dispense the smallest quantities directly from the bottle – a big help, particularly for serial dispensing operations. This approach can even reduce costs, since disposable tips are not necessary.

The ergonomic design makes dispensing simple and uncomplicated. The VITLAB piccolo can be used with just one hand. Use the thumb (just like pipetting) to depress the volume dispensing button. The spring-loaded piston refills the micro-dispenser automatically after dispensing. The discharge tube can be rotated 360° so the dispenser can always be used with the

label visible for safety. In order to guarantee high levels of resistance to chemicals and a broad range of applications, only high-quality materials, such as PTFE, PFA, ETFE, FEP, borosilicate glass and platinum-iridium, come in contact with the media.

- The VITLAB „piccolo“ comes in four fixed-volume sizes: 100 µl, 250 µl, 500 µl and 1000 µl.
- With the VITLAB „piccolo 2“, two fixed volumes can easily be set with a twist of the button. The „piccolo 2“ is also available in four nominal volumes of 100 µl, 250 µl, 500 µl and 1000 µl.
- Other volumes are available on request.

The image shows two Vitlab piccolo pipettes mounted on brown glass bottles. The pipettes are white with red accents, including a red ring at the top and a red cap on the discharge tube. The brand name 'VITLAB' and 'piccolo' are printed on the side of each pipette. The pipette on the left has a red label with the number '500'. The pipette on the right has a red label with a square and the number '1'. The background is a solid blue color. Three callout lines with horizontal bars at the end point to specific features: the top pipette's volume adjustment button, the red cap of the right pipette, and the tapered discharge tube of the right pipette.

Adjustable volumes with a twist of the button („piccolo 2“ only)

One-handed operation

The highest levels of precision thanks to tapered discharge tube.

Rotates freely 360° on bottle to a convenient position

Burette VITLAB „continuous“

Certified for conformity according to DIN 12600

Items supplied

- continuous burette
- 3 PP adapters (GL 32, GL 38, S 40)
- 1 telescopic intake tube
- 1 telescopic discharge tube
- 2 micro-batteries 1,5 V (LR 03/AAA)
- Instruction manual
- Quality certificate
