

Description:

High current density due to double mesa technology;
GT60 Series triacs is suitable for general purpose AC switching.

Applications:

they can be used as an ON/OFF function in applications such as static relays, heating regulation, induction motor starting circuits... or for phase control operation light dimmers, motor speed controllers

Features:

GT60 series are 3 Quadrants TRIACS, They are specially recommended for use on inductive loads.
GT60 series are non-insulated design
Blocking voltage to 1000/12000/1600V
On-state RMS current to 60A
Non-repetitive peak on-state current to 600A
