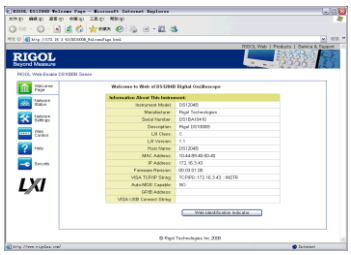
PictBridge print standard

DS1000B series offer standard configure interface and support PictBridge print standard, there are two modes are available: "PictBridge" and "Normal", you can select the mode and setup corresponding parameters to finish printing operation.

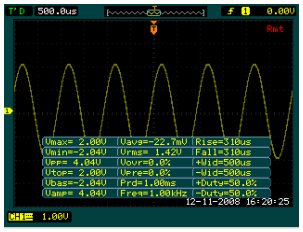
LXI Standard, Class C



LXI standard, class C

RIGOL DS1000B series digital oscilloscopes conform to LXI consortium instrument standard class C, which enable to create and reset testing system fast, economically and efficiently, in addition, the system integration function will be achieve more easily.

Automatically Measure 22 Wave Parameters



Automatic measure

DS1000B series oscilloscopes provide 22 types of wave parameters for automatically measuring which contains 10 Voltage and 12 Time parameters.

In cursor mode, users can easily measure by moving cursor. Besides, 3 types of cursor measurement are optional: Manual, Track and Auto.

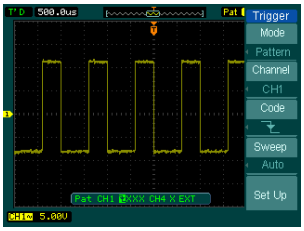
Multiple Trigger



Pattern trigger

DS1000B contain abundant triggers: Edge, Pulse Width, Video, Pattern and Alternative triggers. Especially the pattern trigger achieves trigger operation according to the logic relationship among channels, which can capture special digital information.

Unique function of adjustable trigger sensitivity is good for filtering possible noise from signal in order to avoid false triggers.

Waveform Recording

In virtue of waveform recording function from DS1000B series, not only the outputs from four channels could be recorded, but also the waves outputted by Pass/Fail test could be easily recorded. Totally, up to 1000 frames of waves are available to record. Besides, users can analyze waves according to recall or save transient waves so as to get more exact datum.

Waveform recording

UltraScope Software

RIGOL provides powerful PC application software: UltraScope, which enables to: Capture and measure wave; Perform local or remote operation; Save waves as ".bmp" format; Save files as ".txt" or ".xls" format; Print waveforms.
