

Certificate of Analysis

HSV-1 PBS lysate antigen

Description: A high concentration of HSV-1 particles and proteins from a clarified cell lysate.

Product code: HS104

Virus: Herpes Simplex Virus type 1, strain 17+

Batch number: 17021513

Amount per vial: 1ml

Protein conc.: 1.1 mg/ml (by BCA assay)

Purity: PBS cell lysate, freeze/thawed and clarified by centrifugation

Buffer: PBS + 0.1% Triton x-100

Inactivation: 0.1% Triton x-100. Tested by attempted passage in permissive cells showing no detectable CPE for 5 days.

Usage advice: Avoid repeated freeze/thawing. Vortex before use. If needed, can be sonicated.

Short term storage: Store frozen at less than -20°C, preferably -80°C

Long term storage: Store frozen at less than -20°C, preferably -80°C
