PRODUCT DATA SHEET

Product Name: ANTI-DOPAMINE β-HYDROXYLASE, C-TERMINUS ANTIBODY

Product Code: P60201-100

Pack Size: 100 μL

Description: DBH catalyzes the conversion of dopamine to norepinephrine and serves as a marker of noradrenergic cells. DBH antibodies and antibodies for other markers of catecholamine biosynthesis are widely used as markers for dopaminergic and noradrenergic neurons in a variety of applications including depression, schizophrenia, Parkinson's disease and drug abuse (Kish et al., 2001; Zhu et al., 2000; Zhu et al., 1999). The expression of DBH is also elevated during stress (Sabban and Kvetnansky, 2001).

Physical State: Liquid; Buffer contents: 10 mM

HEPES (pH 7.5), 150 mM NaCl, 100 µg per mL BSA and 50% glycerol

Storage/Stability: Stable at -20 °C for at least 1 year.

For long term storage -20 °C is

recommended

Purification Prepared from sheep serum by **Method:** affinity purification using a Sulfo-

Link® column matrix to which the

peptide immunogen was coupled.

Shipping Domestic: Blue Ice

Conditions: International: Blue Ice or Dry Ice

Host Species: Sheep (Polyclonal)

*M***r** (**kDa**): 75

 $\label{eq:mmunogen:peptide} \begin{picture}(100,0) \put(0,0){\line(1,0){100}} \put(0,0){\line(1,0)$

conjugated to keyhole limpet hemocyanin (KLH).

Species Reactivity: The antibody has been directly tested for reactivity in Western blots with human, mouse, and non-human primate tissue.

Recommended Antibody Dilutions:

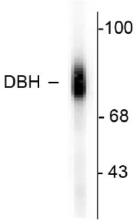

WB: 1:1000

Western Blot

Human adrenal medulla lysate showing specific immunolabeling of the ~75k DBH protein.

Application Key: WB - Western Blot IF - Immunofluorescence IHC - Immunohistochemistry IP - Immunoprecipitation
