PRODUCT DATA SHEET

Product Name: ANTI-AMYLOID PRECURSOR PROTEIN ANTIBODY

Product Code: P40000-100

Pack Size: 100 μL

Description: A large body of evidence has implicated the amyloid precursor protein (APP) in the pathogenesis of Alzheimer's disease (AD) (Kamenetz et al., 2003). The phosphorylation of APP at Thr⁶⁶⁸ is thought to play a critical role in generation of the soluble APP (*beta*) and *beta*-amyloid peptide (*abeta*) which are the major components of senile plaques in patient brains inflicted with AD (Liu et al., 2003; Ando et al., 2001).

Host Species: Rabbit (Polyclonal)

*M***r** (**kDa**): 115

Immunogen: Peptide corresponding to amino acid residues from the C-terminal region of rat APP. Immunolabeling of the APP protein band is completely blocked by preadsorption of the antibody with the peptide used as antigen.

Species Reactivity: The antibody has been directly tested for reactivity in rat tissue. It is anticipated that the antibody will also work with canine, chicken, human, mouse and non-human primate tissues based on the fact that these species have 100% homology with the amino acid sequence used as antigen.

Recommended Antibody Dilutions:

WB: 1:1000

References:

- 1) Ando K et al. (2001) *J Biol Chem* 276:40353-40361.
- 2) Kamenetz F et al. (2003) *Neuron* 37:925-937.3) Liu F et al. (2003) *FEBS Lett* 547:193-196.

Physical State: Liquid; Buffer contents: 10 mM

HEPES (pH 7.5), 150 mM NaCl, 100 μg per mL BSA and 50% glycerol

Storage/Stability: Stable at -20 °C for at least 1 year.

For long term storage -20 °C is

recommended

Purification Prepared from rabbit serum by Method: Prepared from rabbit serum by affinity purification on a column made

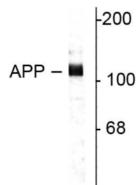

with the C-terminal peptide used as

antigen.

Shipping Domestic: Blue Ice

Conditions: International: Blue Ice or Dry Ice

Western Blot
Rat hippocampal
lysate showing
specific
immunolabeling of
the ~115k APP
protein.

Application Key: WB – Western Blot IF – Immunofluorescence IHC – Immunohistochemistry IP - Immunoprecipitation
