

## BoNT

Cat.No. 158 002; Polyclonal rabbit antibody, 200 µl antiserum (lyophilized)

### Data Sheet

Reconstitution/ Storage	200 µl antiserum, lyophilized. For reconstitution add 200 µl H <sub>2</sub> O, then aliquot and store at -20°C until use.
Applications	<b>WB:</b> 1 : 1000 up to 1 : 10000 (AP staining) <b>IP:</b> not tested yet <b>ICC:</b> not tested yet <b>IHC:</b> not tested yet <b>IHC-P/FFPE:</b> not tested yet
Immunogen	Recombinant protein corresponding to AA 1 to 422 from Clostridium botulinum BoNT (UniProt Id: Q00496)
Specificity	Specific for BoNT E.

#### TO BE USED IN VITRO / FOR RESEARCH ONLY NOT TOXIC, NOT HAZARDOUS, NOT INFECTIOUS, NOT CONTAGIOUS

The neurotoxins of Clostridium botulinum **BoNTs** belong to the most potent protein toxins. These Zinc proteases elicit paralysis by cleaving SNARE proteins like SNAP 25, Syntaxin 1 and Synaptobrevin which mediate the fusion of synaptic vesicles with the presynaptic membrane.

There are seven known serotypes of BoNTs (A to G) with different cleavage properties. BoNTs are translated as ~150 kDa single-chain, non-toxic precursor proteins which are cleaved into a catalytic light chain (LC) and a heavy translocation chain (HCT).
