

SynCAM 2

Cat.No. 243 203; Polyclonal rabbit antibody, 50 µg specific antibody (lyophilized)

Data Sheet

Reconstitution/ Storage	50 µg specific antibody, lyophilized. Affinity purified with the immunogen. Rabbit serum albumin was added for stabilization. For reconstitution add 50 µl H ₂ O to get a 1mg/ml solution in PBS. Then aliquot and store at -20°C until use.
Applications	WB: 1 : 1000 (AP staining) IP: not tested yet ICC: 1 : 100 IHC: 1 : 100 IHC-P/FFPE: not tested yet
Immunogen	Synthetic peptide corresponding to AA 167 to 181 from mouse SynCAM2 (UniProt Id: Q8BLQ9)
Reactivity	Reacts with: rat (Q1WIM2), mouse (Q8BLQ9). Other species not tested yet.
Specificity	Specific for synCAM 2. (K.O. verified)
matching control	243-2P

**TO BE USED IN VITRO / FOR RESEARCH ONLY
NOT TOXIC, NOT HAZARDOUS, NOT INFECTIOUS, NOT CONTAGIOUS**

Development of synapses involves transsynaptic interactions of dedicated synaptic adhesion molecules like neuroligins, neurexins and synCAMs (**Synaptic cell adhesion molecules**). Four SynCAM isoforms have been described so far. All share a common domain structure and contain three extracellular Ig domains, a single transmembrane region, and a short COOH-terminal cytoplasmic tail. **SynCAM 2** has been shown to be associated to myelinated axons and **synCAM 3** can serve as a receptor for herpes viruses.
