

## Brain lysate

Cat.No. 506-TOT; , 200 µg tissue lysate

### Data Sheet

Reconstitution/ Storage	200 µg lysate in 1 X SDS PAGE loading buffer 'ready to use'. Total volume: 100 µl. Concentration: 2 mg/ml. Aliquot and store at -20°C until use.
Applications	<b>WB:</b> yes
507-P2 synaptosomal fraction (P2)	100 µg lysate in 1 X SDS PAGE loading buffer 'ready to use'. Total volume: 50 µl. Concentration: 2 mg/ml. Aliquot and store at -20°C until use.
Loading/lane	10 µg
Source	Balb-C
Remarks	Since several synaptic proteins aggregate after boiling, these lysates are unboiled. Boil sample before loading, if this is recommended for your protocol.

### TO BE USED IN VITRO / FOR RESEARCH ONLY NOT TOXIC, NOT HAZARDOUS, NOT INFECTIOUS, NOT CONTAGIOUS

In many cases the relative concentration of the protein of interest is high enough to use whole brain lysate for Western blot testing. If the concentration is less than 0.2% of total protein it may be difficult to distinguish signals from background noise. Since a lot of proteins are localized in distinct cellular compartments, subfractioning may overcome this problem. Fractions have been prepared according to our protocol. Protein concentration has been determined with a Bradford protein quantification assay.
