## Get advanced HPLC/UHPLC filter efficiency with the purity of glass.

The new Whatman™ Mini-UniPrep™ G2 Syringeless Filter prepares samples for HPLC/UHPLC analysis three times faster than the traditional syringe filter method. Like the original Mini-UniPrep, it also reduces solvent and lab waste. And thanks to the new glass design, your sample will be as pure as possible with minimal risk of plastic leachables. All of which make the need for the new Mini-UniPrep G2 rather pressing.
