Minimum Loading	None required for single unit applications. 10% loading required in N+1, N2 configurations.
Output Turn-on Delay	<2 sec from AC turn on. <100 msec from remote enable.
Over/Under Shoot.....	None at turn-on or turn-off.

Over Current/Short Circuit Protection	Load current hiccup (cycles on/off). Automatic recovery when overload is removed.
Over Voltage Protection	Non-crowbar type. Output exceeding 25%±10% of nominal Vout will cause the unit to latch off. Remote enable or AC input recycle required to reset.

-Signals, Indicators and Controls-

Remote Enable.....	Enabled by closed circuit or TTL logic 0. Disabled by open circuit or TTL logic 1.
Power Fail Warning	Loss of input AC causes a TTL compatible signal to go low >4msec prior to the output dropping out of regulation. At AC turn-on, signal stays low until the output is in regulation. PF signal also triggered by an under voltage condition (V-out 10% below V-nom.)
LED Indicator.....	Front panel mounted, single-color LED. Green indicates AC power ON and output within regulation. Off indicates an input output power fault.
