

55 Watt Power Over Ethernet Indoor Adapter 0334B5555

The 0334B5555 is a P.O.E (Power Over Ethernet) combined data and power adapter that interfaces to the customer's wireless modem and other Link and Net outdoor products. The unit provides an RJ-45 input connector, that includes 10/100 Base-T transformers for connection to an IEEE 802.3 (10/100 Base-T) compatible device. The unit receives power from 100V to 240V using an industry standard IEC320C14 connector. An output RJ45 connector provides the 10/100 Base-T data and 55V or other voltages for connection to the wireless modem
