

## PRODUCT DATA SHEET

**Product Name:** ANTI-TYROSINE HYDROXYLASE ANTIBODY

**Product Code:** P40101-150

**Pack Size:** 150 µL

**Description:** Tyrosine hydroxylase (TH) is the rate-limiting enzyme in the synthesis of the catecholamines dopamine and norepinephrine. TH antibodies can therefore be used as markers for dopaminergic and noradrenergic neurons in a variety of applications including depression, schizophrenia, Parkinson's disease and drug abuse (Kish et al., 2001; Zhu et al., 2000; Zhu et al., 1999). TH antibodies can also be used to explore basic mechanisms of dopamine and norepinephrine signaling (Witkovsky et al., 2000; Salvatore et al., 2001; Dunkley et al., 2004).

**Physical State:** Liquid; Buffer contents: 10 mM HEPES (pH 7.5), 150 mM NaCl, 100 µg per mL BSA and 50% glycerol

**Storage/Stability:** Stable at -20 °C for at least 1 year. For long term storage -20 °C is recommended

**Purification Method:** Prepared from rabbit serum by affinity purification using a protein A column and using a column to which the immunogen was coupled.

**Shipping Conditions:** Domestic: Blue Ice  
International: Blue Ice or Dry Ice

**Host Species:** Rabbit (Polyclonal)

**Mr (kDa):** 60

**Immunogen:** SDS-denatured rat tyrosine hydroxylase, purified from pheochromocytoma

**Species Reactivity:** All mammalian and at least some non-mammalian forms of the enzyme in Western blots and in IHC/IF.

**Recommended Antibody Dilutions:**

**WB, IF, IHC: 1:1000**

**Western Blot**

10 µg of rat caudate lysate showing specific immunolabeling of the ~60k TH protein.

**Application Key:** WB – Western Blot IF – Immunofluorescence IHC – Immunohistochemistry IP – Immunoprecipitation
