## PRODUCT DATA SHEET

Product Name: ANTI-PHOSPHO-Thr<sup>75</sup> DARPP-32 ANTIBODY

**Product Code:** P40005-100

Pack Size: 100 μL

**Description:** DARPP-32 is a dopamine (DA) and cAMP-regulated ~32k phosphoprotein that is associated with dopaminoceptive neurons (Fienberg et al., 1998). The protein inhibits protein phosphatase I when it is phosphorylated on Thr<sup>34</sup>. In contrast, when DARPP-32 is phosphorylated on Thr<sup>75</sup> the protein acts as an inhibitor of PKA (Bibb et al., 1999). Phosphorylation of DARPP-32 is thought to play a critical role in the regulation of dopaminergic neurotransmission. In addition, the activity of DARPP-32 is also thought to play important roles in the actions of alcohol, caffeine and Prozac® (Maldve et al., 2002; Lindskog et al., 2002; Svenningsson et al., 2002).

Physical State: Liquid; Buffer contents: 10 mM

HEPES (pH 7.5), 150 mM NaCl, 100

 $\mu g$  per mL BSA and 50% glycerol

**Storage/Stability:** Stable at -20 °C for at least 1 year.

For long term storage -20 °C is

recommended

**Purification** Prepared from rabbit serum by **Method:** affinity purification via sequential

chromatography on phospho- and

dephosphopeptide affinity columns.

Shipping Domestic: Blue Ice

Conditions: International: Blue Ice or Dry Ice

Host Species: Rabbit (Polyclonal)

*M***r** (**kDa**): 32

**Immunogen:** Phosphopeptide corresponding to amino acid residues surrounding the phospho-Thr<sup>75</sup> of rat DARPP-32.

**Species Reactivity:** The antibody has been directly tested for reactivity in Western blots with rat tissue. It is anticipated that the antibody will react with bovine, canine, chicken, human, mouse, and non-human primates based on the fact that these species have 100% homology with the amino acid sequence used as antigen.

## **Recommended Antibody Dilutions:**

WB: 1:1000

## **Western Blot** Rat caudate lysate showing specific immunolabeling of the ~32k DARPP-32 phosphorylated at Thr75 100 (Control). Immunolabeling is 68 completely eliminated by treatment with λ-43 DARPP-32 phosphatase shown in lane 2.

Application Key: WB - Western Blot IF - Immunofluorescence IHC - Immunohistochemistry IP - Immunoprecipitation
