\$20 Metallic Design Level 1 Ball Valve

Air-Powered Double-Diaphragm Pump

ENGINEERING, PERFORMANCE & CONSTRUCTION DATA

Explanation of Pump Nomenclature

S20 Metallic · Design Level 1 · Ball Valve

MODEL	Pump Brand	Pump Size	Check Valve Type	Design Level	Wetted Material	Diaphragm/ Check Valve Materials	Check Valve Seat	Non-Wetted Material Options	Porting Options	Pump Style	Pump Options	Shipping Kit Options	Weight Ibs. (kg)

P0.= 0-30VDC Pulse Output Kit

P1.= Intrinsically-Safe 10-30VDC Pulse Output Kit

P2.= 110/120 or 220/240VAC Pulse Output Kit

P3.= Intrinsically-Safe 110/120VAC Pulse Output Kit

P4.= Intrinsically-Safe 220/240VAC Pulse Output Kit

SP.= Stroke Indicator Pins

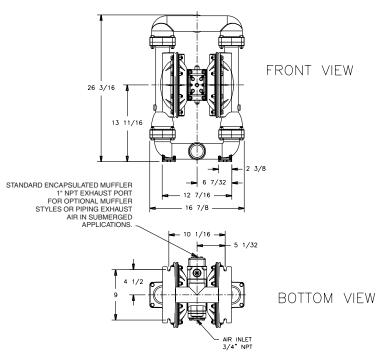

A CAUTION! Operating temperature limitations are as follows:

	Operating Temperatures				
Materials	Maximum	Minimum			
Buna N General purpose, oil-resistant. Shows good solvent, oil, water and hydraulic fluid resistance. Should not be used with highly polar solvents like acetone and MEK, ozone, chlorinated hydrocarbons and nitro hydrocarbons.	190°F 88°C	-10°F -23°C			
EPDM Shows very good water and chemical resistance. Has poor resistance to oil and solvents, but is fair in ketones and alcohols.	280°F 138°C	-40°F -40°C			
Neoprene All purpose. Resistant to vegetable oil. Generally not affected by moderate chemicals, fats, greases and many oils and solvents. Generally attacked by strong oxidizing acids, ketones, esters, nitro hydrocarbons and chlorinated aromatic hydrocarbons.	200°F 93°C	-10°F -23°C			
Santoprene® Injection molded thermoplastic elastomer with no fabric layer. Long mechanical flex life. Excellent abrasion resistance.	275°F 135°C	-40°F -40°C			
Virgin PTFE Chemically inert, virtually impervious. Very few chemicals are known to react chemically with PTFE: molten alkali metals, turbulent liquid or gaseous fluorine and a few fluoro-chemicals such as chlorine trifluoride or oxygen difluoride which readily liberate free fluorine at elevated temperatures.	220°F 104°C	-35°F -37°C			
Viton ® Shows good resistance to a wide range of oils and solvents; especially all aliphatic, aromatic and halogenated hydrocarbons, acids, animal and vegetable oils. Hot water or hot aqueous solutions (over 70°F) will attack Viton.	350°F 177°C	-40°F -40°C			
Polypropylene	180°F 82°C	32°F 0°C			

For specific applications, always consult The Warren Rupp Chemical Resistance Chart

Dimensions: S20 Metallic

Dimensions in Inches
Dimensional Tolerance:±1/8"

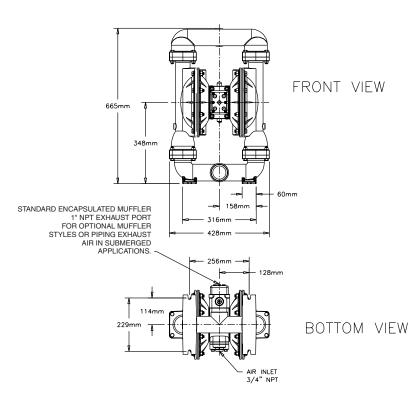

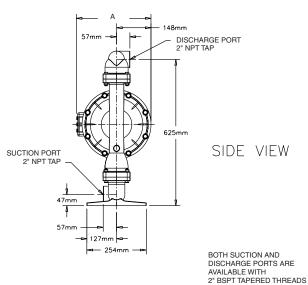

BOTH SUCTION AND DISCHARGE PORTS ARE AVAILABLE WITH 2" BSPT TAPERED THREADS

DIMENSION	А
Standard Pump	12 19/32
Pulse Output Kit	13 31/32
Mesh Muffler	14 17/32
